

HACKEE HOOK HANGERS

The Hackee Hook hanger was designed for hanging things on the ceiling in an aesthetic and solid way. It is a great solution to **hang a planter** with your favorite flowers, a **swing**, textile **lighting cables** or any other thing that comes to your mind - and the fixing is invisible.

Hackee Hooks are manufactured in Poland in controlled conditions with the use of state-of-the-art machinery and from carefully selected materials. Thanks to that they can be used for many years even outdoors.

Hackee Hook Hangers are available in 2 different shapes.

Dimensions

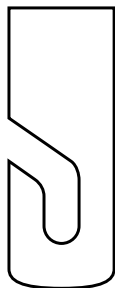

Height:
100mm (3.94 inch),
Diameter:
38 mm (1,5 inch),
Width of rope groove:
12 mm (0,5 inch).

Material

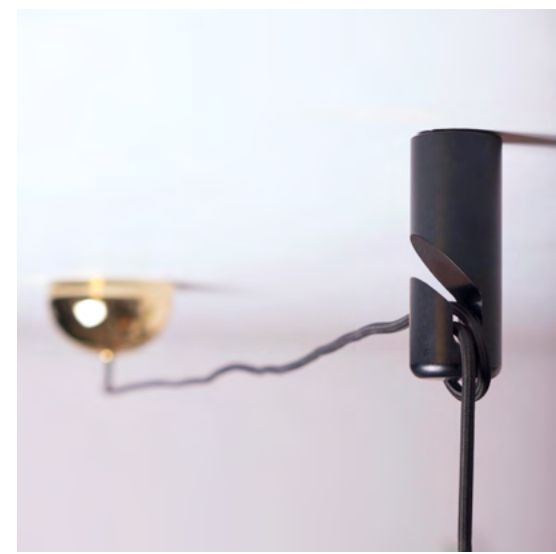

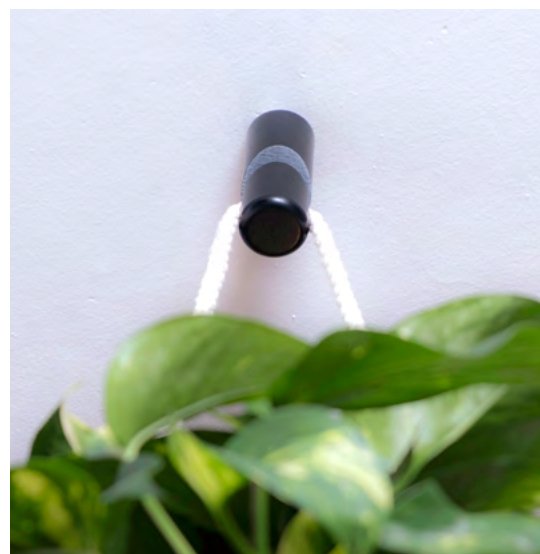

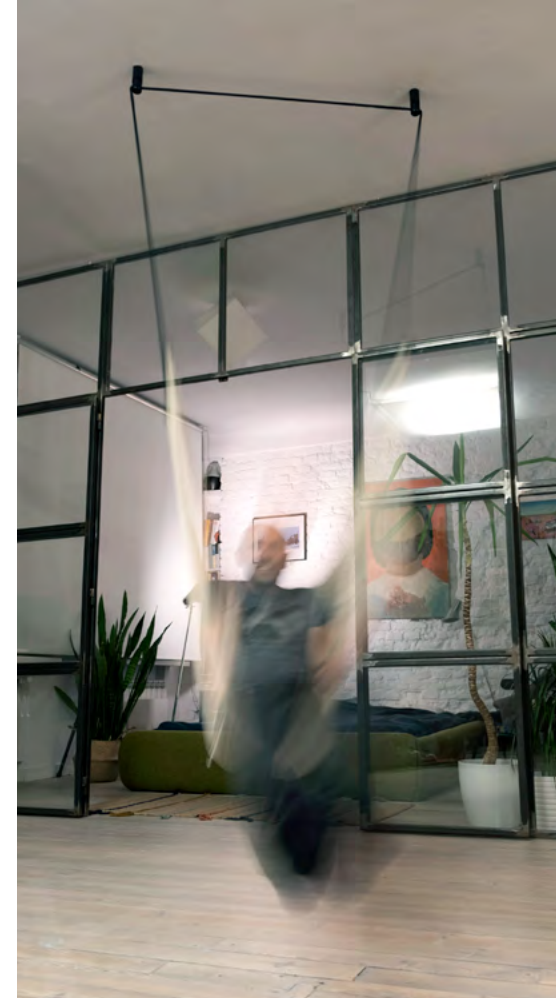

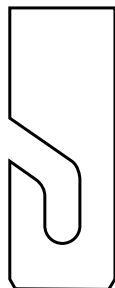

Solid Aluminium

project

Rounded
shape (R)

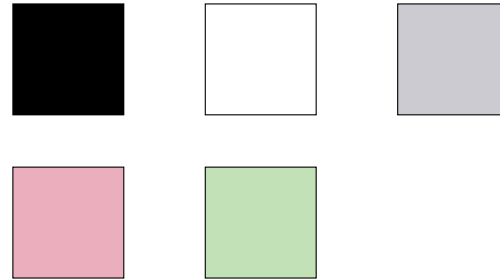

Chamfered
shape (F)

Hakee Hook Hangers are available in 5 colors:

Fixing and capacity

The capacity depends on the ceiling material and fixing which always must be carefully checked; however, each Hakee Hook is designed and tested for the load of 110 kg (242 lbs).

Hakee hooks can be fixed to any ceiling that can carry the load you plan to hang. It has an M10 threaded hole, so it can be fixed with any M10 bolt suitable to your ceiling. For example, for non-cracked concrete ceilings we recommend Fischer FXA Through Bolts - M10 x 126mm.
